## Activity 24 Assessment

Equivalent Ratios and Rates

| Representing Equivalent Ra | ios and Rates |  |  |
| :---: | :---: | :---: | :---: |
| Uses multiplicative relationships to represent and create ratios and rates (ratio table). <br> It takes 6 cups of blueberries to make a pie. <br> How many cups of blueberries will I need to make 5 pies? | Represents and records ratios and rates symbolically. <br> $6: 1,12: 2,18: 3,24: 4,30: 5$ | Represents and creates equivalent ratios and rates. <br> The ratio of cups of blueberries to pies is $30: 5$. Identify equivalent ratios. <br> "I multiply or divide each term by the same number. Equivalent ratios: | Flexibly represents and creates equivalent ratios and rates. <br> A baker sells 2 pies for $\$ 15$. How much did the baker make if 7 pies were sold? <br> " 7 is halfway between 6 and 8 , so I find the number halfway between 45 and 60 , which is $\$ 52.50$." |
