

Measurements About YOU!

Lalie Harcourt and Ricki Wortzman

Illustrated by Pascale Constantin

Pearson

If you've already met me, you'll know that I like numbers a lot. If you haven't met me before, I'll use numbers to tell you a little bit about myself. Here goes!

When I was born, I was measured.

I was 55 **centimetres (cm)** long and weighed 3850 **grams (g)**.
That means I weighed *almost* 4 **kilograms (kg)**.

I say "*almost* 4 kg" because I didn't weigh quite that much.

How much less than 4 kg did I weigh? I know a paper clip weighs *about* 1 g. So, if I had been holding *about* 150 paper clips when they weighed me, the total weight would have been *about* 4 kg.
