PART 1: INTRODUCTION TO FINANCIAL MANAGEMENT

Chapter 1: Getting started—Principles of finance

*Introduction: Getting started—Principles of
finance*

Learning objectives
Principles of finance
Finance Spotlight: Your money

1.1: Finance—An overview

What is finance?
Why study finance?

1.2: Three types of business organisation

Sole proprietorship
Partnership
Corporation
How does finance fit into a firm's
organisational structure?

1.3: The goal of the financial manager

Maximising shareholder wealth
Ethical considerations in corporate finance

1.4: The five basic principles of finance

The five principles explained

*Summary: Getting started - Principles of
finance*

Applying the principles of finance to
Chapter 1
Mind map summary
Summary of chapter objectives
Study questions

Chapter 2: Firms and the financial market

Introduction: Firms and the financial market

Learning objectives
Principles of finance
Finance Spotlight: Your money

2.1: The basic structure of the Australian financial markets

2.2 The financial marketplace—Financial institutions

Commercial banks: Everyone's financial
marketplace
Non-bank financial intermediaries
Investment companies

2.3: The financial marketplace—Securities markets

How securities markets bring corporations
and investors together
Types of security
Stock markets
Financial markets and the Global Financial
Crisis (GFC)

Summary: Firms and the financial market

Applying the principles of finance to
Chapter 2
Mind map summary
Summary of chapter objectives
Study questions

Chapter 3: Understanding financial statements, taxes and cash flows

*Introduction: Understanding financial
statements, taxes and cash flows*

Learning objectives
Principles of finance
Finance Spotlight: Your money

3.1: An overview of the firm's financial statements

- Basic financial statements
- Why study financial statements?
- What are the accounting principles used to prepare financial statements?

3.2: The income statement

- Income statement of H. J. Boswell Ltd
- Connecting the income statement and the balance sheet
- Interpreting firm profitability using the income statement
- IFRS and earnings management

3.3: Corporate tax, personal tax and dividend imputation

- Calculating taxable income and company tax payable
- Personal income tax
- Capital gains tax
- Other taxes
- Dividend imputation

3.4 The balance sheet

- The balance sheet of H. J. Boswell Ltd
- Firm liquidity and net working capital
- Debt and equity financing
- Book values, historical costs and market values
- Finance spotlight: Your money

3.5 The cash flow statement

- Sources and uses of cash
- H. J. Boswell's cash flow statement
- Tools of financial analysis

Summary: Understanding financial statements, taxes and cash flows

- Applying the principles of finance to Chapter 3
- Mind map summary
- Summary of chapter objectives
- Study questions
- Study problems
- Mini-case

Chapter 4: Financial analysis: Sizing up firm performance

Introduction: Financial analysis: Sizing up firm performance

- Learning objectives
- Principles of finance
- Finance Spotlight

4.1: Why do we analyse financial statements?

4.2: Common-size statements—Standardising financial information

- The common-size income statement: H. J. Boswell Ltd

- The common-size balance sheet: H. J. Boswell Ltd

4.3: Using financial ratios

- Liquidity ratios
- Capital structure ratios
- Asset management efficiency ratios
- Profitability ratios
- Market value ratios
- Summing up the financial analysis of H. J. Boswell Ltd

4.4: Selecting a performance benchmark

- Trend analysis
- Peer-firm comparisons

4.5: Limitations of ratio analysis

Summary: Financial analysis: Sizing up firm performance

- Applying the principles of finance to Chapter 4
- Mind map summary
- Summary of chapter objectives
- Study questions
- Study problems
- Mini-case

PART 2: VALUATION OF FINANCIAL ASSETS

Chapter 5: The time value of money—The Basics

Introduction: The time value of money—The Basics

- Learning objectives
- Principles of finance
- Finance Spotlight: Your money

5.1: Using timelines to visualise cash flows

5.2: Compounding and future value

- Compound interest and time
- Compound interest and the interest rate
- Techniques for valuing cash flows at different points in time
- Applying compounding to things other than money
- Compound interest with shorter compounding periods
- Finance Spotlight: Your money

5.3: Discounting and present value

- The mechanics of discounting future cash flows
- Discounting with shorter discounting periods
- Two additional types of discounting problem
- The Rule of 72

5.4: *Making interest rates comparable*
Calculating the interest rate and converting it to an EAR
To the extreme: Continuous compounding
Summary: The time value of money—The Basics
Applying the principles of finance to Chapter 5
Mind map summary
Summary of chapter objectives
Study questions
Study problems
Mini-case

Chapter 6: The time value of money—Annuities and other topics

Introduction: The time value of money—Annuities and other topics
Learning objectives
Principles of finance
Finance Spotlight: Your money
6.1 *Annuities*
Ordinary annuities
Annuities due
6.2 *Perpetuities*
Calculating the present value of a level perpetuity
Calculating the present value of a growing perpetuity
6.3 *Complex cash-flow streams*
Summary: The time value of money—Annuities and other topics
Applying the principles of finance to Chapter 6
Mind map summary
Summary of chapter objectives
Study questions
Study problems
Mini-case

Chapter 7: Risk and return—An introduction: History of financial market returns

Introduction: Risk and return—An introduction: History of financial market returns
Learning objectives
Principles of finance
Finance Spotlight
7.1: *Realised and expected rates of return and risk*
Calculating the realised return from an investment

Calculating the expected return from an investment
7.2: *A brief history of financial market returns*
Australian financial markets: Domestic investment returns
Lessons learned
Australian shares versus other categories of investment
Global financial markets: International investing
7.3: *Geometric versus arithmetic average rates of return*
Calculating the geometric or compound average rate of return
Choosing the right 'average'
7.4: *What determines share prices?*
The efficient markets hypothesis
Do we expect financial markets to be perfectly efficient?
Market efficiency: What does the evidence show?
Summary: Risk and return—An introduction History of financial market returns
Applying the principles of finance to Chapter 7
Mind map summary
Summary of chapter objectives
Study questions
Study problems
Mini-case

Chapter 8: Risk and return—Capital market theory

Introduction: Risk and return—Capital market theory
Learning objectives
Principles of finance
Finance Spotlight: Your money
8.1 *Portfolio returns and portfolio risk*
Calculating the expected return of a portfolio
Evaluating portfolio risk
Calculating the standard deviation of a portfolio's returns
8.2 *Systematic risk and the market portfolio*
Diversification and unsystematic risk
Systematic risk and beta
Calculating the portfolio beta
Tools of financial analysis
8.3 *The security market line and the CAPM*
Using the CAPM to estimate expected rates of return
Tools of financial analysis

Summary: Risk and return—Capital market theory

Applying the principles of finance to Chapter 8
Mind map summary
Summary of chapter objectives
Study questions
Study problems
Mini-case

Chapter 9: Share valuation

Introduction: Share valuation

Learning objectives
Principles of finance
Finance spotlight: Your money

9.1: Ordinary shares

Characteristics of ordinary shares
Finance Spotlight: Your money
Agency costs and ordinary shares
Valuing ordinary shares using the discounted dividend model
Determinants of the investor's required rate of return
Determinants of the growth rate of future dividends

9.2: The comparables approach to valuing ordinary shares

Defining the price/earnings (P/E) ratio valuation model
What determines the P/E ratio for a share?
An aside on managing for shareholder value

9.3: Preference shares

Features of preference shares
Valuing preference shares
A quick review: Valuing bonds, preference shares and ordinary shares

Summary: Share valuation

Applying the principles of finance to Chapter 9
Mind map summary
Summary of chapter objectives
Study questions
Study problems
Mini-case

Chapter 10: Debt valuation and interest rates

Introduction: Debt valuation and interest rates

Learning objectives
Principles of finance
Finance Spotlight: Your money

10.1: Overview of government and corporate debt

Borrowing money in the private financial market
Borrowing money in the public financial market
Basic bond features
Finance Spotlight: Your money

10.2: Valuing bonds

Step 1: Determine bondholder cash flows
Step 2: Estimate the appropriate discount rate
Step 3: Calculate the present value using the discounted cash flow

10.3: Bond valuation—Four key relationships

First relationship
Second relationship
Third relationship
Fourth relationship

10.4: Types of bond

Basic bond attributes

10.5: Determinants of interest rates

Inflation and real versus nominal interest rates
Interest rate determinants: Breaking it down
The maturity-risk premium and the term structure of interest rates

Summary: Debt valuation and interest rates

Applying the principles of finance to Chapter 10
Mind map summary
Summary of chapter objectives
Study questions
Study problems

PART 3: CAPITAL BUDGETING

Chapter 11: Investment decision criteria

Introduction: Investment decision criteria

Learning objectives
Principles of finance
Finance Spotlight: Your money

11.1 An overview of capital budgeting

The typical capital budgeting process
What are the sources of good investment projects?
Types of capital investment project

11.2 Net present value

Why is NPV the right criterion?
Calculating an investment's NPV
Independent versus mutually exclusive investment projects

11.3 Other investment criteria

- Internal rate of return
- Modified internal rate of return
- Payback period
- Discounted payback period
- Summarising the alternative decision rules

11.4 A glance at actual capital budgeting practices

Summary: Investment decision criteria

- Applying the principles of finance to Chapter 11
- Mind map summary
- Summary of chapter objectives
- Study questions
- Study problems
- Mini-cases

Chapter 12: Analysing project cash flows

Introduction: Analysing project cash flows

- Learning objectives
- Principles of finance
- Finance Spotlight

12.1 Project cash flows

- Incremental cash flows are what matters
- Guidelines for forecasting incremental cash flows

12.2 Forecasting project cash flows

- Dealing with depreciation expense, tax and cash flow
- Four-step procedure for calculating project cash flows
- Calculating project NPV

12.3 Inflation and capital budgeting

12.4 Replacement project cash flows

- Identifying cash flows for replacement projects
- Replacement example
- Finance Spotlight: International

Summary: Analysing project cash flows

- Applying the principles of finance to Chapter 12
- Mind map summary
- Summary of chapter objectives
- Study questions
- Study problems
- Mini-cases
- Appendix: The diminishing value depreciation method

Chapter 13: Risk analysis and project evaluation

Introduction: Risk analysis and project evaluation

- Learning objectives

Principles of finance

Finance Spotlight: Your money

13.1: The importance of risk analysis

13.2: Relevant measures of risk in capital budgeting

- Measuring risk for capital budgeting purposes, and a dose of reality

Finance Spotlight: International

13.3: Incorporating risk into the capital-budgeting process

- Risk-adjusted discount rates
- Certainty-equivalent approach
- Certainty-equivalent versus risk-adjusted discount rate methods
- Risk-adjusted discount rate and measurement of a project's systematic risk

13.4: Tools for analysing the risk of project cash flows

- Key concepts: Expected values and value drivers
- Sensitivity analysis
- Scenario analysis
- Simulation analysis
- Probability trees

13.5: Real options in capital budgeting

Summary: Risk analysis and project evaluation

- Applying the principles of finance to Chapter 13
- Mind map summary
- Summary of chapter objectives
- Study questions
- Study problems
- Mini-case

Chapter 14: The cost of capital

Introduction: The cost of capital

- Learning objectives
- Principles of finance
- Finance Spotlight: Your money

14.1: The cost of capital - An overview

- Investor's required return and the firm's cost of capital
- WACC equation
- Three-step procedure for estimating the firm's WACC

14.2 Determining the firm's capital-structure weights

14.3 Estimating the cost of individual sources of capital

- The cost of debt
- The cost of preference shares
- The cost of ordinary shares
- Estimating the rate of growth

14.4 *Summing up—Calculating the firm's weighted average cost of capital*

14.5 *Estimating project costs of capital*

The rationale for using multiple discount rates

Why don't firms typically use project costs of capital?

Estimating divisional WACCs

14.6 *Flotation costs and project NPV*

Summary: The cost of capital

Applying the principles of finance to Chapter 14

Mind map summary

Summary of chapter objectives

Study questions

Study problems

Mini-case

PART 4: CAPITAL-STRUCTURE AND DIVIDEND POLICY

Chapter 15: Analysis and impact of leverage

Introduction: Analysis and impact of leverage

Learning objectives

Principles of finance

Finance Spotlight: Your money

15.1: *Business and financial risk*

15.2: *Break-even analysis*

Accounting break-even analysis

NPV break-even analysis

Limitations of break-even analysis

15.3: *Operating and financial leverage*

Operating leverage

Financial leverage

Combination of operating leverage and financial leverage

Implications of leverage analysis

15.4: *EBIT—EPS analysis*

Evaluating the effect of financial leverage on firm earnings per share

Summary: Analysis and impact of leverage

Applying the principles of finance to Chapter 15

Mind map summary

Summary of chapter objectives

Study questions

Study problems

Mini-case

Chapter 16: Capital-structure policy

Introduction: Capital-structure policy

Learning objectives

Principles of finance

Finance Spotlight: Your money

16.1: *A glance at capital-structure choices in practice*

Defining a firm's capital structure

Financial leverage

How do firms in different industries finance their assets?

16.2: *Capital-structure theory*

Yogi Berra and the M&M capital-structure theorem

Capital structure, the cost of equity and the weighted average cost of capital

Why capital structure matters in reality

The trade-off theory and the optimal capital structure

Capital-structure decisions and agency costs

Making financing choices when managers are better informed than shareholders

Managerial implications

16.3: *Why do capital structures differ across industries?*

16.4: *Making financing decisions*

Benchmarking the firm's capital structure

Can the firm afford more debt?

Survey evidence: Factors that influence CFO debt policy

Summary: Capital-structure policy

Applying the principles of finance to Chapter 16

Mind map summary

Summary of chapter objectives

Study questions

Study problems

Mini-case

Appendix: Demonstrating the Modigliani and Miller theorem

Chapter 17: Dividend and share-buyback policy

Introduction: Dividend and share-buyback policy

Learning objectives

Principles of finance

Finance Spotlight: Your money

17.1: *How do firms distribute cash to their shareholders?*

Cash dividends

Share buybacks

Personal tax considerations: Dividend versus capital gains income

Non-cash distributions: Bonus shares and share splits

- 17.2: *Does dividend policy matter?*
 - Why dividend policy is important
- 17.3: *Cash-distribution policies in practice*
 - Stable payout
 - Residual dividend payout policy
 - Other factors playing a role in how much to distribute
- Summary: Dividend and share-buyback policy*
 - Applying the principles of finance to Chapter 17
 - Mind map summary
 - Summary of chapter objectives
 - Study questions
 - Study problems
 - Mini-case

PART 5: LIQUIDITY MANAGEMENT AND SPECIAL TOPICS IN FINANCE

Chapter 18: Financial forecasting and planning

- Introduction: Financial forecasting and planning*
 - Learning objectives
 - Principles of finance
 - Finance Spotlight: Your money
- 18.1: *An overview of financial planning*
- 18.2: *Developing a long-term financial plan*
 - Financial forecasting example: Ziegen Ltd
- 18.3 *Developing a short-term financial plan*
 - Example cash budget: Melco Furniture Ltd
 - Uses of the cash budget
- Summary: Financial forecasting and planning*
 - Applying the principles of finance to Chapter 18
 - Mind map summary
 - Summary of chapter objectives
 - Study questions
 - Study problems
 - Mini-case

Chapter 19: Working capital management

- Introduction: Working capital management*
 - Learning objectives
 - Principles of finance
 - Finance Spotlight: Your money
- 19.1: *Working capital management and the risk-return trade-off*
 - Measuring firm liquidity
 - Managing firm liquidity
 - Risk—return trade-off
- 19.2: *Working capital policy*
 - The principle of self-liquidating debt

- A graphic illustration of the principle of self-liquidating debt
- 19.3: *Operating cycle and cash conversion cycle*
 - Measuring working capital efficiency
 - Calculating the operating cycle and cash conversion cycle
- 19.4: *Managing current liabilities*
 - Calculating the cost of short-term financing
 - Evaluating the cost of trade credit
 - Evaluating the cost of bank loans
- 19.5 *Managing the firm's investment in current assets*
 - Cash and marketable securities
 - Managing accounts receivable
 - Managing inventories
- Summary: Working capital management*
 - Applying the principles of finance to Chapter 19
 - Mind map summary
 - Summary of chapter objectives
 - Study questions
 - Study problems
 - Mini-case

Chapter 20: Corporate risk management

- Introduction: Corporate risk management*
 - Learning objectives
 - Principles of finance
 - Finance Spotlight
- 20.1: *Five-step corporate risk-management process*
 - Step 1: Identify and understand the firm's major risks
 - Step 2: Decide which types of risk to keep and which to transfer
 - Step 3: Decide how much risk to assume
 - Step 4: Incorporate risk into all the firm's decisions and processes
 - Step 5: Monitor and manage the risks the firm assumes
- 20.2: *Managing risk with insurance contracts*
 - Types of insurance contract
 - Why purchase insurance?
- 20.3: *Managing risk by hedging with forward contracts*
 - Hedging commodity-price risk using forward contracts
 - Hedging currency risk using forward contracts
- 20.4: *Managing risk with exchange-traded financial derivatives*
 - Futures contracts
 - Options contracts

20.5: Valuing options and swaps

The Black-Scholes option pricing model

Swap contracts

Credit default swaps

Summary: Corporate risk management

Applying the principles of finance to

Chapter 20

Mind map summary

Summary of chapter objectives

Study questions

Study problems

Mini-case
