CHAPTER 1

Teachers, teaching and educational psychology 1

Teachers' casebook: What would you do? 1
Chapter outline 2
Do teachers make a difference? 2
Teacher–student relationships 3
Teacher quality 3
Stories of learning/Tributes to teaching 4
What is good teaching? 4
Inside four classrooms 4
Expert teachers 5
Beginning teachers 6
Point/Counterpoint: What is good teaching? 7
The goal of teaching: Lifelong learning 8
Reaching every student: Encouragement for a beginning teacher 8
The role of educational psychology 9
Is it just common sense? 9
Using research to understand and improve teaching 11
Becoming a good beginning teacher 15
Understandings about education, learning and teaching 15
Summary 17
Key terms 18
Useful websites 19
Related topics 19
Teachers' casebook: What would they do? 20

CHAPTER 2

Culture and community 21

Teachers' casebook: What would you do? 21
Chapter outline 22
The importance of context 23
Bronfenbrenner's bioecological model of development 23
Cultural diversity 24
Individuals, groups and education 24
What is culture? 26
Cultural intersections and terminology 28
Stereotypes, prejudice and discrimination 29
Stereotypes: The good and the bad 30
From stereotype to prejudice 30
From prejudice to discrimination 32
The family context 32
Divorce 34
Parenting style 34
Domestic and family violence 36
How can teachers help? 36
Social class and economic diversity 37
SES and achievement 37
Ethnic and racial diversity 40
Ethnic and racial diversity in school achievement 40
The legacy of discrimination 41
Gender diversity 42
Sex and gender 42
Gender identity 42
Gender roles 43
Gender bias 45
Point/Counterpoint: Do boys and girls learn differently? 46
Sexual orientation 48
What can teachers do? 48
Language diversity 49
Dialects 49
Bilingualism 51
Reaching every student: Recognising giftedness in bilingual students 55
Creating culturally responsive classrooms 56
Culturally responsive pedagogy 56
Responding to cultural diversity 57
Bringing it all together: Teaching every student 60
Know yourself 60
Know your students 60
Respect your students 60
Teach your students 60
Summary 62
Key terms 65
Useful websites 66
Related topics 67
Teachers' casebook: What would they do? 68

Guidelines:
Family and community partnerships: Building learning communities 33
Helping children of divorce 35
Avoiding gender bias in teaching 47
Dialects in the classroom 51
Culturally responsive teaching 61

CHAPTER 3

Physical and cognitive development 69

Teachers' casebook: What would you do? 69
Chapter outline 70
Defining development 70
Three questions about development 71
General principles of development 72

The developing brain 72
Levels of functioning 73
Neurons 74
Neuroscience, learning and teaching 76
Point/Counterpoint: Brain-based education 77
Physical development 78
Growth 78
Motor development 81
Piaget's theory of cognitive development 82
Influences on development 83
Basic tendencies in thinking 83
Stages of cognitive development 84
Stories of learning/Tributes to teaching 90
Implications of Piaget's theory for teachers 92
Understanding and building on students' thinking 92
Activity and constructing knowledge 92
Some limitations of Piaget's theory 93
Neo-Piagetian views of cognitive development 94
Vygotsky's sociocultural perspective 95
Social sources of individual thinking 96
Cultural tools and cognitive development 97
The role of language and private speech 97
The zone of proximal development 98
Implications of Vygotsky's theory for teachers 99
Assisted learning 99
Reaching every student: Scaffolding learning 100
Some limitations of Vygotsky's theory 100
Vygotsky's and Piaget's views compared 101
The development of language 103
When and how language develops 103
Diversity in language: Dual-language development 104
Language development in the school years 105
Theory of mind 109
Thinking about mental states 109
Acquiring a theory of mind 110
The importance of theory of mind 111
Summary 112
Key terms 115
Useful websites 115
Related topics 116
Teachers' casebook: What would they do? 117

Guidelines:
Teaching the preoperational child 87
Teaching the concrete operational child 89
Helping students to use formal operations 91
Applying Vygotsky's ideas in teaching 101
Family and community partnerships: Promoting literacy 109

CHAPTER 4

Personal, emotional, social and moral development 118

Teachers' casebook: What would you do? 118
Chapter outline 119
The work of Erikson 119
The preschool years: Trust, autonomy and initiative 120
Primary and middle school years: Industry versus inferiority 121
Adolescence: The search for identity 121
Beyond the school years 124
Understanding ourselves and others 124
Self-concept 125
Self-esteem 126
Point/Counterpoint: What should schools do to encourage students' self-esteem? 127
Gender, ethnicity, self-concept and self-esteem 128
The self and others 130
Emotional development 131
Emotions 131
Temperament 132
Emotional competence and school 133
Social development 134
Social competence 134
Peer relationships and peer cultures 135
Reaching every student: Learning to listen 136
Supporting social and emotional learning 139
Moral development 140
Kohlberg's stages of moral development 141
Alternatives to Kohlberg's theory 142
Diversity in moral reasoning 143
Values education 144
Reaching every student: The Values Education Good Practice Schools Project 146
Community outside the classroom: Community service learning 146
Moral behaviour: Aggression, bullying and cheating 148
Aggression 148
Students who bully 150
Cyberbullying 153
Reaching every student: Student guide to online safety 154
Cheating 155
Challenges and risks for students 156
Navigating transitions 156
Children and youth at risk 159
Resilience and coping 167
Teaching young people to cope 168
Diversity and coping 168
Stories of learning/Tributes to teaching 169
Summary 171
Key terms 174
Useful websites 174
Related topics 175
Teachers' casebook: What would they do? 176

Guidelines:
Encouraging initiative in preschool children 121
Encouraging industry 122
Supporting identity formation 123
Encouraging emotional competence 134
Supporting personal development 147
Dealing with aggression and encouraging cooperation 152
Developing effective transition programs 159

CHAPTER 5

Learner differences and learner needs 177

Teachers' casebook: What would you do? 177
Chapter outline 178
Learner differences and labelling 178
Person-first language 179
Impairment, disability and handicap 179
Individual differences in intelligence 180
What does intelligence mean? 180
Intelligence as a process 183
How is intelligence measured? 184
Creativity 187
Defining creativity 187
Assessing creativity 188
What are the sources of creativity? 189
Creativity in the classroom 189
Ability differences and differentiated teaching 191
Ability grouping 191
Point/Counterpoint: Is streaming an effective strategy? 192
Cognitive styles and learning preferences 194
Cognitive styles 194
Learning preferences 196
Integration and inclusion 197
Least restrictive environment 198
Individual education plans 199
The rights of students and families 199
Prevalent problems and disabilities 200
Students with learning disability 200
Reaching every student: Higher-order comprehension and severe learning disability 204
Students with intellectual disability 204
Students with communication impairments 205
Students with sensory impairments 207
Students with social, emotional or behavioural disorders 208
Students with hyperactivity and attention disorders 210
Students with autism spectrum disorders 212
Stories of learning/Tributes to teaching 213
Students with physical and health impairments 213
Students who are gifted and talented 214
Who are these students? 214
Identifying students who are gifted and talented 216
Summary 220
Key terms 222
Useful websites 223
Related topics 223
Teachers' casebook: What would they do? 224

Guidelines:
Interpreting IQ scores 186
Encouraging creativity 190
Flexible grouping 193
Family and community partnerships: Productive conferences 200
Teaching students with mild intellectual disability 205
Disciplining students with social, emotional or behavioural difficulties 209

CHAPTER 6

Behavioural views of learning 225

Teachers' casebook: What would you do? 225
Chapter outline 226
Understanding learning 226
Learning: A definition 226
Learning is not always what it seems 227
Early explanations of learning: Contiguity and classical conditioning 228
Pavlov's dilemma and discovery: Classical conditioning 228
Generalisation, discrimination and extinction 229
Operant conditioning: Trying new responses 230
Types of consequences 231
Neuroscience of reinforcement and punishment 232
Reinforcement schedules 233
Antecedents and behaviour change 235
Applied behaviour analysis and positive behaviour support 236
Methods for encouraging appropriate behaviours: Positive behaviour support 237
Stories of learning/Tributes to teaching 239
Responding to undesirable behaviour 240
Behavioural approaches to teaching and classroom management 242
Group consequences 242
Token reinforcement systems 243
Reaching every student: Students with challenging behaviours 243
Contingency contracts 244
Behaviour self-management and self-regulation 245
Criticisms and challenges 247
Criticisms of behavioural methods 247
Point/Counterpoint: Should students be rewarded for learning? 248
Ethical issues 249
Summary 250
Key terms 251
Useful websites 252
Related topics 252
Teachers' casebook: What would they do? 253

Guidelines:
Applying classical conditioning 230
Encouraging positive behaviours: Appropriate praise and encouragement 237
Responding to undesirable behaviour 241
Family and community partnerships: Student self-management 246

CHAPTER 7

Cognitive views of learning 255

Teachers' casebook: What would you do? 255
Chapter outline 256
Elements of the cognitive perspective 256
Comparing cognitive and behavioural views 256

The brain and learning 257
The importance of knowledge in learning 257
Cognitive views of memory 259
Sensory memory 259
Point/Counterpoint: What's wrong with multitasking? 263
Working memory 264
Long-term memory 269
Capacity, duration and contents of long-term memory 269
Explicit memories: Semantic and episodic 269
Implicit memories 272
Storing and retrieving information in long-term memory 273
Reaching every student: Building memory skills 274
Developmental and individual differences and memory 276
Developmental differences and working memory 277
Individual differences in working memory 278
Individual differences in long-term memory 278
Becoming knowledgeable: Some basic principles 279
Development of declarative knowledge 279
Development of procedural knowledge 281
Summary 284
Key terms 286
Useful websites 286
Related topics 286
Teachers' casebook: What would they do? 287

Guidelines:
Gaining and maintaining attention 264
Using information processing ideas in the classroom 277
Family and community partnerships: Organising learning—Becoming knowledgeable 283

CHAPTER 8

Complex cognitive processes 288

Teachers' casebook: What would you do? 288
Chapter outline 289
Metacognition 289
Metacognitive knowledge and regulation 289
Individual differences in metacognition 290
Learning and teaching about concepts 291
Views of concept learning 291
Strategies for teaching concepts 292
Teaching concepts through discovery 295
Problem solving 296
Problem solving: General or domain-specific? 296
Identifying problems and opportunities 296
Defining goals and representing the problem 297
Exploring possible solution strategies 299
Anticipating, acting and looking back 300
Factors that hinder problem solving 301
Expert knowledge and problem solving 302
Expert learning strategies and study skills 304
Learning strategies and tactics 305
Reading strategies 307
Reaching every student: Teaching them how to learn 308
Applying learning strategies 309
Point/Counterpoint: Should schools teach critical thinking and problem solving? 309
Teaching for transfer 310
Teaching for positive transfer 311
Stories of learning/Tributes to teaching 312
Summary 314
Key terms 316
Useful websites 316
Related topics 316
Teachers' casebook: What would they do? 317

Guidelines:
Applying Bruner's ideas 295
Problem solving 304
Family and community partnerships: Promoting transfer 313

CHAPTER 9

Social cognitive and constructivist views of learning 319

Teachers' casebook: What would you do? 319
Chapter outline 320
Social cognitive theory 320
Beyond behavioural explanations of learning 320
Triadic reciprocal causation 321
Learning by observing others 323
Elements of observational learning 323
Factors that influence observational learning 324
Observational learning in teaching 324
Constructivism and situated learning 326
Constructivist views of learning 327
How is knowledge constructed? 328
Knowledge: Situated or general? 329
Common elements of constructivist perspectives 330
Applying constructivist perspectives 331
Inquiry and problem-based learning 331
Reaching every student: Problem-based learning 334
Point/Counterpoint: Are inquiry and problem-based learning effective teaching approaches? 336
Dialogue and instructional conversations 337
Reaching every student: Lunch learning 338
Cognitive apprenticeships and reciprocal teaching 338
Cognitive apprenticeships in thinking 340
Play as a context for learning 341
An integrated constructivist approach: Fostering communities of learners 341
Group work, cooperation and collaborative learning 342
Making group learning work 344
Strategies for cooperation and collaboration 346
Working with families 348
Looking back at learning 349
Summary 350
Key terms 352
Useful websites 352
Related topics 352
Teachers' casebook: What would they do? 353

Guidelines:
Using observational learning 326
Using cooperative and collaborative learning 347

CHAPTER 10

Motivation in learning and teaching 354

Teachers' casebook: What would you do? 354
Chapter outline 355
What is motivation? 355
Meeting some students 356
Intrinsic and extrinsic motivation 357
Five general approaches to motivation 358
Behavioural approaches to motivation 358
Humanist approaches to motivation 359
Cognitive approaches to motivation 359
Social cognitive approaches to motivation 359
Sociocultural conceptions of motivation 360
Needs 361
Maslow's hierarchy of needs 361
Self-determination: Need for autonomy, competence and relatedness 362
Needs and teaching 363
Stories of learning/Tributes to teaching 364
Goal orientations 365
Types of goals and goal orientations 365
Goal orientations in school 366
Goals and teaching 368
Beliefs, attributions and self-perceptions 369
Beliefs about knowing: Epistemological beliefs 369
Beliefs about ability 370
Beliefs about causes and control: Attribution theory 370
Beliefs about self-efficacy 373
Beliefs about self-worth 375
Interests, curiosity and emotions 377
Tapping interests 377
Curiosity: Novelty and complexity 379
Point/Counterpoint: Does making learning fun make for good learning? 379
Emotions and anxiety 380
Interests, curiosity, emotions and teaching 382
Self-regulation and human agency 383
Models of self-regulated learning and agency 384
Student motivation and engagement to learn 385
Motivation and teaching 388
On TARGET for learning 388
Tasks for learning 388
Supporting autonomy and recognising accomplishment 390
Grouping, evaluation and time 390
Bringing it all together: Strategies to encourage motivation and thoughtful learning 393
Can I do it? Building confidence and positive expectations 393
Do I want to do it? Seeing the value of learning 394
What do I need to do to succeed? Staying focused on the task 395
Summary 397
Key terms 401
Useful websites 401
Related topics 401
Teachers' casebook: What would they do? 402

Guidelines:
Supporting self-determination and autonomy 364
Encouraging a healthy mindset 372
Encouraging self-efficacy and self-worth 376
Building on students' interests and curiosity 378
Coping with anxiety 383
Family and community partnerships: Motivation to learn 395

CHAPTER 11

Creating supportive learning environments 403

Teachers' casebook: What would you do? 403
Chapter outline 404
The need for organisation 404
The basic task: Gain student cooperation 405
The goals of classroom management 405
Creating a positive learning environment 407
Some research results 407
Procedures and rules 408
Planning spaces for learning 413
Getting started: The first weeks of class 415
Maintaining a good environment for learning 417
Encouraging engagement 417
Prevention is the best medicine 417
Caring relationships 419
Teacher–student relationships 419
Responding to inappropriate or disruptive behaviour 420
Special problems with secondary school students 421
Student conflicts and confrontations 422
Stories of learning/Tributes to teaching 424
Point/Counterpoint: Is zero tolerance a good idea? 425
The need for communication 426
Message sent—Message received 426
Diagnosis: Whose problem is it? 426
Counselling: The student's problem 427
Assertive responses and confrontation 428
Mediation and behaviour support 429
Conflict resolution and peer mediation 429
A restorative approach to behaviour management 430
Communicating with families about classroom management 431
Summary 433
Key terms 435
Useful websites 435
Related topics 435
Teachers' casebook: What would they do? 436

Guidelines:
Establishing class procedures 409
Establishing procedures and rules for remote learning 411
Designing learning spaces 414
Keeping students engaged 418
Imposing penalties 422
Handling potentially explosive situations 424
Family and community partnerships: Classroom management 432

CHAPTER 12

Teaching for learning 437

Teachers' casebook: What would you do? 437
Chapter outline 438
Understanding teaching 438
Characteristics of effective teachers 439
Teacher expectations 441
Expectation effects 441
Sources of expectations 441
Do teachers' expectations really affect students' achievement? 442
Teacher behaviour and student reaction 443
The first step: Planning 445
Goals for learning 446
Using taxonomies and questions for planning 447
Planning from a constructivist perspective 450
Teaching approaches 454
Direct instruction and explanation 454
Independent work 457
Point/Counterpoint: Is homework a valuable use of time? 458
Questioning 460
Group discussion 463
Digital technologies and learning 465
Technology-enhanced learning environments 466
Digital games 467
Blended and flipped learning 468
Does the use of technology support academic learning? 469
Student-centred teaching 470
Stories of learning/Tributes to teaching 470
The e5 instructional model 471
Differentiated teaching 472
Differentiated teaching in inclusive classrooms 473
Technology and differentiated teaching 474
Reaching every student: Resource rooms, collaborative consultation and cooperative teaching 475
Beyond the debates to outstanding teaching 475
Summary 476
Key terms 479
Useful websites 479
Related topics 479
Teachers' casebook: What would they do? 480

Guidelines:
Teaching effectively 440
Avoiding the negative effects of teacher expectations 444
Using learning/instructional objectives 451
Family and community partnerships: Homework 459
Productive group discussions 465
Teaching for understanding 471

CHAPTER 13

Standardised testing 482

Teachers' casebook: What would you do? 482
Chapter outline 483
Assessment, measurement and evaluation 483
Norm-referenced tests 484
Criterion-referenced tests 485
What do test scores mean? 486
Basic concepts 486
Types of scores 488
Interpreting test scores 490
Types of standardised tests 494
Achievement tests: What has the student learned? 494
Diagnostic tests: What are the student's strengths and weaknesses? 496
Aptitude tests: How well will the student do in the future? 496
Issues in standardised testing 497
How widespread is standardised testing? 497
Accountability and high-stakes testing 498
Preparing for tests 499
Point/Counterpoint: Should tests be used to hold teachers accountable? 500
Accommodating diversity in testing 501
Stories of learning/Tributes to teaching 502
Alternatives to standardised testing 504
Alternative assessment 504
Teacher accountability and assessment 505
Summary 506
Key terms 507
Useful websites 508
Related topics 508
Teachers' casebook: What would they do? 509

Guidelines:
Increasing reliability and validity 492
Family and community partnerships: Explaining and using test results 497
Preparing for tests or examinations: Advice for students 501
Accommodations in testing 503

CHAPTER 14

Assessment and reporting 510

Teachers' casebook: What would you do? 510
Chapter outline 511
Formative and summative assessment 511
Assessment 511
Functions of assessment 512
Getting the most from traditional assessment approaches 514
Evaluating ready-made tests 514
Selected-response testing 515
Essay testing 516
Alternatives to traditional assessment 519
Point/Counterpoint: Which is better—traditional tests or authentic assessments? 520
Stories of learning/Tributes to teaching 521
Authentic classroom assessment 521
Assessment of student performance 522
Evaluating student performance 525
Effects of grades and grading on students 529
Effects of failure 529

Effects of feedback 530
Grades and motivation 531
Reaching every student: Beyond grading 532
Grading and reporting: Nuts and bolts 533
Norm-referenced versus criterion-referenced grading 533
Assessment and reporting frameworks: The point system and percentage grading 535
Grading effort and improvement 537
Cautions: Being fair 538
Diversity and grading 538
Beyond grading: Communicating with families 538
Summary 541
Key terms 542
Useful websites 543
Related topics 543
Teachers' casebook: What would they do? 544

Guidelines:
Writing selected-response test items 517
Creating portfolios 524
Developing a rubric 528
Minimising the detrimental effects of grades 533
Family and community partnerships: Meetings 539

References 545
Names index 591
Subject index 603
