

Graph It!

Carole Fullerton and Sharon Jeroski

Illustrated by Jean Morin

Pearson

Matt and Zoey are sorting some toys.
They make 2 piles. One pile has cars.
One pile has trucks.
“I wonder how many of each we have?”
asks Zoey.

They line up the cars and trucks in the parking lot. Each car and each truck gets a spot.

Ms. Lightbody says, "Oh look! You made your graph. Now I can tell what we have more of!"
