NEW SENIOR MATHEMATICS

ADVANCED + EXTENSION 1

YEAR 11, FOURTH EDITION

CONTENTS

■ Mathematics Advanced

■ Mathematics Extension 1

CHAPTER 1 Algebraic techniques

- 1.1 Index laws with integers as indices
 - 1.2 Index laws with fractional indices
 - 1.3 Basic polynomials
 - 1.4 Factorising by grouping in pairs
 - 1.5 Standard factorisations
 - 1.6 Factorising quadratic trinomials
 - 1.7 Factorising non-monic trinomials
 - 1.8 Mixed factorisations
 - 1.9 Algebraic fractions
 - 1.10 Adding and subtracting algebraic fractions
 - 1.11 Real numbers and surds
 - 1.12 Adding and subtracting surds
 - 1.13 The distributive law
 - 1.14 Rationalising denominators
- Chapter review 1

CHAPTER 2 Further algebraic techniques

- 2.1 Quadratic equations
 - 2.2 General quadratic equations
 - 2.3 Solving quadratic equations by completing the square
 - 2.4 Quadratic equations with non-rational solutions
 - 2.5 Completing the square for non-monic equations
 - 2.6 The quadratic formula
 - 2.7 The discriminant
 - 2.8 Problems involving quadratic equations
- Chapter review 2

CHAPTER 3 Inequalities

- 3.1 Quadratic and cubic inequalities
 - 3.2 Rational function inequalities (x in denominator)
 - 3.3 Inequalities involving absolute value
- Chapter review 3

CHAPTER 4 Functions and relations

- 4.1 Relations and functions
 - 4.2 Gradient of a straight line
 - 4.3 Equation of a straight line
 - 4.4 Perpendicular distance of a point from a line
 - 4.5 Intersection of two lines
 - 4.6 Simultaneous equations
 - 4.7 Problems involving simultaneous equations
 - 4.8 Linear inequalities
 - 4.9 Simultaneous linear inequalities
- Chapter review 4

CHAPTER 5 Further functions

- 5.1 Quadratic functions
 - 5.2 Parabolas and discriminants
 - 5.3 Further example involving discriminants
 - 5.4 Cubic polynomials
 - 5.5 The equation $y = \frac{k}{x}$ and inverse variation, reciprocal functions
 - 5.6 Sketching basic functions
 - 5.7 Circles
 - 5.8 Square roots and absolute value
 - 5.9 Absolute value functions
 - 5.10 Piecewise defined functions
 - 5.11 Solving simultaneous equations – linear and second degree
 - 5.12 Solving simultaneous equations – linear and second degree in general form?
 - 5.13 Solution set of simultaneous equations
 - 5.14 Direct and inverse variation
- Chapter review 5

CHAPTER 6 Polynomials

- 6.1 Polynomials
 - 6.2 Division of polynomials and the remainder theorem
 - 6.3 The factor theorem
 - 6.4 Relationship between roots and coefficients
 - 6.5 Multiple roots of a polynomial equation
 - 6.6 Polynomial functions
- Chapter review 6

CHAPTER 7 Trigonometry and measures of angles

- 7.1 Exact values of trigonometric ratios
 - 7.2 Review of right-angled triangles
 - 7.3 Direction and bearing
 - 7.4 Angles of elevation and depression
 - 7.5 Angles of any magnitude
 - 7.6 More trigonometric exact values
 - 7.7 The sine rule
 - 7.8 The cosine rule
 - 7.9 Area of a triangle
 - 7.10 Applied trigonometry
- Chapter review 7

CHAPTER 8 Radians

- 8.1 Radian measure of an angle
 - 8.2 Angle of any magnitude – radians
 - 8.3 Graphs of trigonometric functions
 - 8.4 Arc length and sector area of a circle
 - 8.5 Trigonometric identities and proofs
 - 8.6 Solving trigonometric equations
- Chapter review 8

CHAPTER 9 Further trigonometry

- 9.1 Trigonometry in three dimensions
 - 9.2 Sum and difference of two angles
 - 9.3 Double angle formulae
 - 9.4 Using identities to simplify expressions and prove results
 - 9.5 Overview of trigonometric equations
 - 9.6 Simple trigonometric equations
 - 9.7 Trigonometric equations involving angle formulae
 - 9.8 Solving trigonometric equations using the auxiliary angle method
 - 9.9 Solving quadratic trigonometric equations
 - 9.10 Solving equations using angle formulae
- Chapter review 9

CHAPTER 10 Probability

- 10.1** Sets and set notation
 - 10.2** Introduction to probability
 - 10.3** Finite sample spaces
 - 10.4** Successive outcomes
 - 10.5** Independent events
 - 10.6** Dependent events
 - 10.7** Discrete random variable
- Chapter review 10

CHAPTER 11 Parametric equations

- 11.1** Parametric form of a function or relation
- Chapter review 11

CHAPTER 12 Permutations and combinations

- 12.1** Fundamental counting principle
 - 12.2** Permutations
 - 12.3** Arrangements of n objects when some are identical
 - 12.4** Combinations
 - 12.5** Counting techniques in probability – An interesting problem
- Chapter review 12

CHAPTER 13 Introduction to differentiation

- 13.1** Rates of change
 - 13.2** Limit and continuity
 - 13.3** Gradient of a curve
 - 13.4** Finding the derivative from first principles
 - 13.5** Conditions for differentiability
 - 13.6** Standard derivatives
 - 13.7** The product rule
 - 13.8** The chain rule
 - 13.9** The quotient rule
 - 13.10** Tangents and normals to a curve
 - 13.11** The gradient as a rate of change
 - 13.12** The sign of the derivative
 - 13.13** Velocity as a rate of change
- Chapter review 13

CHAPTER 14 Exponential and logarithmic functions

- 14.1** Solving equations with exponents
 - 14.2** Exponential function
 - 14.3** Logarithms
 - 14.4** Solving equations with logarithms
 - 14.5** Natural logarithms
 - 14.6** Graphs of exponential and logarithmic functions
- Chapter review 14

CHAPTER 15 Binomial theorem

- 15.1** Expansion of $(1 + x)^n$, Pascal's triangle
 - 15.2** More Pascal's triangle expansions
 - 15.3** Pascal's triangle relations and the binomial theorem
- Chapter review 15

CHAPTER 16 Graph transformations

- 16.1** Transformation of graphs using reflection.
 - 16.2** Transformation of graphs using $y = kf(x)$ and $y = kf(x - a)$
 - 16.3** Transformation of graphs using $y = f(kx)$ and $y = f(k(x + a))$
 - 16.4** Graphing rational algebraic functions
- Chapter review 16

CHAPTER 17 Graphing functions

- 17.1** Reciprocal functions
 - 17.2** Absolute value functions
 - 17.3** Graphing polynomials by adding ordinates
 - 17.4** Graphing reciprocal trigonometric functions
 - 17.5** Inverse functions
- Chapter review 17
