Introduction and dedication . . . . .	iii
---------------------------------------	-----

## YEAR 12

<b>CHAPTER 1 Sequences and series</b>	<b>1</b>
1.1 Arithmetic sequences . . . . .	1
1.2 Series and sigma notation . . . . .	4
1.3 Arithmetic series . . . . .	6
1.4 Geometric sequences . . . . .	10
1.5 Finite geometric series . . . . .	13
1.6 Infinite geometric series . . . . .	16
Chapter review 1 . . . . .	19
<b>CHAPTER 2 Further graph transformation and modelling</b>	<b>21</b>
2.1 Transformations of the trigonometric functions . . . . .	21
2.2 Further solution of trigonometric equations . . . . .	31
2.3 Graphical solution of equations . . . . .	35
2.4 Applications involving trigonometric functions and graphs . . . . .	37
2.5 Logarithms in the real world . . . . .	41
Chapter review 2 . . . . .	46
<b>CHAPTER 3 Differential calculus</b>	<b>48</b>
3.1 Differentiation of exponential functions . . . . .	48
3.2 Derivative of the logarithm function . . . . .	52
3.3 Derivatives of the trigonometric functions . . . . .	59
Chapter review 3 . . . . .	66
<b>CHAPTER 4 Integral calculus 1</b>	<b>67</b>
4.1 Primitive functions . . . . .	67
4.2 Indefinite integrals . . . . .	72
4.3 Integration with the trigonometric functions . . . . .	74
4.4 Integrating the exponential function . . . . .	77
4.5 Integrals resulting in logarithmic functions . . . . .	79
Chapter review 4 . . . . .	81

<b>CHAPTER 5</b>	<b>Integral calculus 2</b>	<b>83</b>
5.1	Area under a curve . . . . .	83
5.2	The definite integral and the area under a curve . . . . .	88
5.3	The definite integral and the primitive function . . . . .	90
5.4	More areas . . . . .	97
5.5	Area bounded by $y$ -axis . . . . .	101
5.6	Definite integrals involving trigonometric functions . . . . .	104
5.7	Definite integrals involving exponential and logarithmic functions. . . . .	106
5.8	Applications involving integrals. . . . .	111
5.9	Approximate methods of integration—trapezoidal rule. . . . .	113
5.10	The average value of a function—an application of integration. . . . .	119
	Chapter review 5. . . . .	121
<b>CHAPTER 6</b>	<b>Applications of calculus</b>	<b>123</b>
6.1	Differentiable and continuous . . . . .	123
6.2	The first derivative and turning points . . . . .	125
6.3	The second derivative and concavity . . . . .	130
6.4	The second derivative and turning points . . . . .	134
6.5	Problem solving with derivatives . . . . .	144
6.6	Applications of the exponential and logarithmic functions . . . .	149
6.7	Exponential growth and decay . . . . .	152
6.8	Further applications of trigonometric functions . . . . .	157
6.9	Using calculus in motion in a straight line . . . . .	158
	Chapter review 6 . . . . .	165
<b>CHAPTER 7</b>	<b>Random variables</b>	<b>168</b>
7.1	Discrete random variables. . . . .	168
7.2	Expected value, variance and standard deviation of discrete probability distributions . . . . .	175
7.3	The uniform distribution. . . . .	186
7.4	Discrete distributions in practical situations . . . . .	189
7.5	Continuous probability distributions . . . . .	193
7.6	The normal distribution . . . . .	210
7.7	The standard normal distribution . . . . .	219
7.8	Using tables of the standard normal distribution . . . . .	224
7.9	The inverse standard normal distribution. . . . .	233
	Chapter review 7. . . . .	239

<b>CHAPTER 8</b>	<b>Financial mathematics</b>	<b>248</b>
8.1	Investments and loans .....	248
8.2	Compound interest applications .....	258
8.3	Further applications of series .....	266
	Chapter review 8. ....	272
	<b>Summary</b> .....	<b>275</b>
	<b>Answers</b> .....	<b>285</b>
	<b>Glossary</b> .....	<b>329</b>
