

PEARSON

BIOLOGY

NEW SOUTH WALES

STUDENT BOOK

11

2ND EDITION

NSW
STAGE 6

Contents

Working scientifically

CHAPTER 1 Working scientifically toolkit	2
1.1 Questioning and predicting	xx
1.2 Planning scientific investigations	xx
1.3 Conducting scientific investigations	xx
1.4 Processing data and information	xx
1.5 Analysing data and information	xx
1.6 Problem-solving	xx
1.7 Communicating	xx
Chapter 1 review	xx

Focus area 1 Cells as the basis of life

CHAPTER 2 Cell structures and functions	xx
2.1 Comparing prokaryotic and eukaryotic cells	xx
2.2 Contrasting plant and animal cells	xx
2.3 Microscopes: tools for studying cells	xx
Chapter 2 review	xx
CHAPTER 3 Cells and their environments	xx
3.1 Cell membranes	xx
3.2 Passive and active transport across membranes	xx
3.3 Key materials and their movement across cell membranes	xx
Chapter 3 review	xx
CHAPTER 4 Biochemical processes	xx
4.1 Cell requirements	xx
4.2 Cellular respiration and photosynthesis	xx
4.3 Enzymes and their importance in cells	xx
Chapter 4 review	xx
CHAPTER 5 Cell division	xx
5.1 The DNA molecule	xx
5.2 Somatic and gametic cells	xx
5.3 The cell cycle and mitosis	xx
5.4 Meiosis	xx
5.5 The importance of DNA replication	xx
Chapter 5 review	xx
Focus area 1 review	xx

Focus area 2 Cells to systems

CHAPTER 6 Cell organisation	xx
6.1 Structures and organisation of cells	xx
6.2 Hierarchical organisation in organisms	xx
Chapter 6 review	xx
CHAPTER 7 Plants as autotrophic organisms	xx
7.1 Requirements of life in plants	xx
7.2 Structure and function of xylem and phloem	xx
Chapter 7 review	xx
CHAPTER 8 Animals as heterotrophic organisms	xx
8.1 The digestive system	xx
8.2 The circulatory system and blood	xx
8.3 The excretory system and the kidney	xx
Chapter 8 review	xx
CHAPTER 9 Homeostasis in humans	xx
9.1 Feedback control and the maintenance of homeostasis	xx
9.2 Regulating blood sugar levels and the stress response	xx
9.3 Physiological responses and tolerance limits	xx
Chapter 9 review	xx
Focus area 2 review	xx

Focus area 3 Evolution and ecosystems

CHAPTER 10 Natural selection	xx
10.1 Evolution by natural selection	xx
10.2 Selective pressures	xx
10.3 Species diversity and evolution	xx
10.4 Convergent and divergent evolution	xx
10.5 Evolution in Australia	xx
Chapter 10 review	xx

CHAPTER 11 Evolution and adaptations	xx
11.1 Adaptations for survival in different environments	xx
11.2 Endotherms and ectotherms	xx
11.3 Indigenous knowledge of local plant and animal adaptations	xx
11.4 Models of evolution and phylogenetic trees	xx
11.5 Evidence of evolution	xx
Chapter 11 review	xx
CHAPTER 12 Ecosystem dynamics	xx
12.1 Investigating abiotic and biotic factors in ecosystems	xx
12.2 Sampling techniques	xx
Chapter 12 review	xx
Focus area 3 review	xx
GLOSSARY	xx
INDEX	xx

Practical and secondary-source investigations addressing the syllabus requirements can be downloaded from the *Pearson Biology 11 New South Wales 2nd edition eBook*.
