

# What Would You Rather?

Carole Fullerton and Sharon Jeroski

Pearson

Hey, grey squirrel,  
what would you rather...?

Grey squirrels bury  
their nuts about  
5 cm deep in the  
ground. Nuts they  
leave behind can  
grow into trees.

Adult grey squirrels eat up to 100 acorns each week.

The African pygmy squirrel is the smallest squirrel in the world. It is only about 10 centimetres long, including its tail. That's about how wide your hand is when your fingers are spread apart.
