

Weird Animals

Many animals have unusual bodies or do unusual things. People sometimes label these animals as weird. They call them the “odd bods” of the animal world.

THAT'S WEIRD!

Rhinoceros hornbills have a huge bill that looks heavy but is actually light. They have another unusual feature on their head. Unlike most other birds, they have eyelashes.

THAT'S WEIRD!

Yellow banana slugs look like bananas, but they do not taste like them. These slimy slugs eat animal droppings.

THAT'S WEIRD!

Trap-door spiders have an unusual way of catching food. They lie in their burrows, which have a trap door over the entrance. When insects go by, the spider pushes open the door and grabs them.
