

Every child deserves the power of language

When oral language is supported, student outcomes improve. OxEd & Assessment gives you fast, reliable tools to spot needs early and support students with confidence.

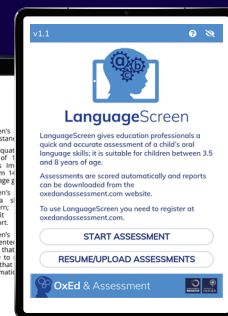

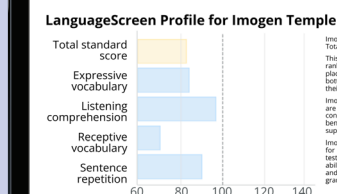

- Based on robust trials and the Science of Learning
- Aligned to New Zealand curriculum
- For early years and primary children.

Research-backed tools to build oral language skills for every student

A simple, reliable way to screen and track progress, with support for whole-class learning at Tier 1, as well as students who need extra help at Tier 2.

Screening

LanguageScreen is an easy-to-use assessment tool that accurately measures oral language abilities of students aged 3-11 years old.

Whole class support

NELI Whole Class helps F-2 classroom teachers deliver oral language enrichment to the entire class, while further boosting the skills of those receiving intervention.

NELI Preschool is used to help 3-4 year-olds build confidence and essential communication skills before starting school.

Intervention

NELI Intervention is proven to improve students' oral language and early literacy skills. It supports Foundation to Year 2 teachers or teacher aides to deliver intervention to students identified through LanguageScreen testing.

Why language is critical in early education and beyond

In these steps, we will explore the impact of poor language skills on children's success in school and look at how NELI has supported children make progress with their language.
