

# CONTENTS

## **PART A** **GEOGRAPHY'S TOOLS AND SKILLS**

<b>CHAPTER 1 Geographical inquiry and skills</b>	<b>2</b>
1.1 Analysing topographic maps	4
1.2 Working with topographic maps	8
1.3 Flow diagrams	10
1.4 Photograph interpretation: Agriculture	14
1.5 Population pyramids	16

## **PART B** **SUSTAINABLE BIOMES**

<b>CHAPTER 2 Biomes</b>	<b>18</b>
2.1 Biomes: Ecosystems and biomes	20
2.2 Energy flows within biomes	22
2.3 The global distribution of biomes	26
2.4 The world's major biomes	28
2.5 Australia's major ecosystems and biomes	30
2.6 Productivity of biomes	34
2.7 Biodiversity's impact on energy and matter	38
2.8 Human alterations to biomes	40
2.9 Biomes and food security	44
2.10 Global pattern of agriculture	48
<b>CHAPTER 3 Food and fibre production</b>	<b>52</b>
3.1 Global food and fibre production	54
3.2 Changing food and fibre production	58
3.3 The agricultural trade	60
3.4 Factors affecting crop yields	64
3.5 Environmental factors affecting crop yields	66
3.6 Climate and crop yields	68
3.7 Significance of soils	72
3.8 Australia's soils	74
3.9 Soil erosion in Australia	76
3.10 Innovations in agriculture	80
3.11 <b>CASE STUDY:</b> The Green and Gene revolutions	82
<b>CHAPTER 4 Challenges to food production</b>	<b>86</b>
4.1 Threats to global food production	88
4.2 Land and water degradation	92
4.3 Shortages of fresh water	96
4.4 Competing landuses	98
4.5 Population growth	100
4.6 Climate change	102
4.7 Agricultural expansion and intensification	104
<b>CHAPTER 5 Food security</b>	<b>106</b>
5.1 Population growth and food production	108
5.2 Potential for expanding food production	112
5.3 Barriers to increasing world food production	114
5.4 Sustainable agriculture	116
5.5 The environmental impacts of agriculture	120
5.6 Restoring the functioning of ecosystems	124
5.7 Australia and the global food chain	126

5.8 Food production in Australia	130
5.9 <b>CASE STUDY:</b> Alternative food supplies	134

## **PART C** **CHANGING PLACES**

<b>CHAPTER 6 Urbanisation</b>	<b>138</b>
6.1 Urbanisation: Growth and impacts	140
6.2 People and large cities	144
6.3 Australia's population distribution	146
6.4 Urbanisation in Asia	150
6.5 Urbanisation in China	154
6.6 Environment and large cities	158
6.7 USA's population distribution	160
6.8 USA: Urban settlement pattern	162
6.9 <b>CASE STUDY:</b> Las Vegas	164
<b>CHAPTER 7 Population movements</b>	<b>166</b>
7.1 Australia: Internal migrations	168
7.2 <b>CASE STUDY:</b> The mobility of Indigenous Australians	170
7.3 China's internal migrations	172
7.4 Impact on Chinese cities	176
7.5 China's rural towns and villages	178
7.6 International migration	180
7.7 Australian migration	184
7.8 Australia's cultural diversity	186
7.9 International migration and urban lifestyles	188
<b>CHAPTER 8 Australia's urban future</b>	<b>190</b>
8.1 Managing growth of cities	192
8.2 Impacts of large cities	196
8.3 <b>CASE STUDY:</b> Canberra	198
8.4 Sustainable cities	202
8.5 <b>CASE STUDY:</b> Sydney: Planning for a sustainable future	206

## **PART D** **ENVIRONMENTAL CHANGE AND MANAGEMENT**

<b>CHAPTER 9 Environments</b>	<b>210</b>
9.1 The environment: Life's support system	212
9.2 Towards a sustainable future	214
9.3 Pollution	216
9.4 Land degradation	218
9.5 Exploited oceans	222
9.6 Habitat loss	224
9.7 Our warming planet	228
9.8 Environmental management	234
9.9 Environmental worldviews	238
9.10 Aboriginal and Torres Strait Islander people: Environmental management	242

<b>CHAPTER 10 Forests</b>	<b>248</b>	<b>CHAPTER 15 Marine environments</b>	
10.1 Forests: The biophysical environment	250	15.1 Marine environments	
10.2 Forests: Causes of environmental change	256	15.2 The importance of marine environments	
10.3 Forests: Managing environments	260	15.3 Human impacts on marine environments	
10.4 <b>CASE STUDY:</b> Canada's forests under threat	264	15.4 Managing marine environments	
10.5 <b>CASE STUDY:</b> Australia's east coast forests	266	15.5 <b>CASE STUDY:</b> Bass Strait	
10.6 Forests: Evaluating management responses	270	15.6 <b>CASE STUDY:</b> Gulf of Mexico	
<b>CHAPTER 11 Inland water</b>	<b>274</b>	<b>CHAPTER 16 Human wellbeing: India</b>	
11.1 The inland water environment	276	16.1 India: An emerging economic giant	
11.2 Causes of environmental change	280	16.2 Patterns of human wellbeing	
11.3 Water flow and environmental health	284	16.3 Contrasts in human wellbeing	
11.4 Managing inland waters	286	16.4 Enhancing human wellbeing	
11.5 Applying human-environment systems thinking	290	16.5 Access to water in India	
11.6 <b>CASE STUDY:</b> The Great Artesian Basin	294	16.6 Access to sanitation, Mumbai	
11.7 <b>CASE STUDY:</b> The Pangani River Basin	298	16.7 Child exploitation in India	
11.8 <b>IN THE FIELD:</b> Rivers and water quality	302	16.8 India's squatter settlements and slums	
		<b>CHAPTER 17 Extension tasks</b>	

---

## **PART E**

### **HUMAN WELLBEING**

<b>CHAPTER 12 Spatial variations in human wellbeing</b>	<b>308</b>
12.1 Development and human wellbeing	310
12.2 Measuring and mapping human wellbeing	312
12.3 Progress in human wellbeing	316
12.4 Causes of spatial inequality	318
12.5 Human wellbeing: The issues	324
12.6 Access to water	328
12.7 Access to sanitation	332
12.8 Child exploitation	334
12.9 Access to shelter	338
12.10 NGOs: Making a difference	342
<b>CHAPTER 13 Human wellbeing: Australia</b>	<b>344</b>
13.1 Poverty in Australia	346
13.2 Spatial patterns of Indigenous advantage and disadvantage	350
13.3 Origins of disadvantage	352
13.4 Measuring wellbeing	356
13.5 Disadvantage in remote communities	358
13.6 Closing the gap	360
13.7 Self-help initiatives	362
13.8 Role of NGOs	364
<b>INDEX</b>	<b>452</b>

---

## **ONLINE CHAPTERS**

<b>CHAPTER 14 Coastal environments</b>	
14.1 The importance of coastal environments	
14.2 Causes of environmental change	
14.3 Managing coastal environments	
14.4 <b>CASE STUDY:</b> The Great Sandy Region	
14.5 <b>CASE STUDY:</b> Bay of Fundy, Canada
